STATE OF ARKANSAS

EMERGENCY ALERT SYSTEM
OPERATIONS PLAN

This plan was prepared by the Arkansas State Emergency Communications Committee in cooperation with the Arkansas Department of Emergency Management, the National Weather Service in North Little Rock, Arkansas, the Arkansas Broadcasters Association, the Arkansas Cable Telecommunications Association, state and local officials, and the broadcasters and cable systems of Arkansas.

EMERGENCY ALERT SYSTEM (EAS) CHECKLIST
for broadcast stations and cable systems

1		All personnel trained in EAS procedures and in the use of EAS equipment.
2		EAS encoders and decoders installed and operating.
3		Correct assignments monitored, according to the EAS state and local area plans.
4		Weekly and monthly EAS tests received and logged.
5		Weekly and monthly EAS tests transmissions completed and logged.
6		EAS Operating Handbook immediately available.
7		Red Authenticator envelope immediately available (broadcasters only).
8		Copies of EAS state and local area plans immediately available.
9		Copy of FCC EAS Rules and Regulations (Part 11) and, if appropriate, AM station emergency operations (Section 73.1250) available.

PURPOSE

The purpose of this document is to explain and provide procedures for the broadcast and cable services and designated government officials of Arkansas to disseminate emergency information and instructions in threatened or actual emergencies.

AUTHORITY

Title 47 U.S.C. 151, 154 (i) and (o), 303 (r), 524 (g), and 606; and 47 C.F.R. Part 11, FCC Rules and Regulations, Emergency Alert System (EAS) as pertains to day-to-day emergency operations.

INTRODUCTION

The Arkansas State Emergency Communications Committee; the Arkansas Department of Emergency Management; the Federal Communications Commission; the National Weather Service in Arkansas; state and local officials; and the broadcasters and cable operators of Arkansas prepared these procedures. It provides background data and prescribes specific procedures for the broadcast and cable media to issue emergency information and warning to the general public in Arkansas or any portion thereof within the broadcast coverage and cable system service area, at the request of designated state and federal government officials.

Acceptance of, or participation in, this plan shall not be deemed to prohibit a licensee or cable operator from exercising his independent discretion and responsibility in any given situation. The concept of management of each broadcast station or cable system to exercise discretion regarding the transmission of emergency messages and instructions to the general public is provided by the FCC Rules and Regulations, Part 11. Broadcast shall be deemed to have conferred rebroadcast authority as specified in Section 11.54 (d).

Detailed procedures, agreed upon by the broadcast and cable industries and the local area governments, which will permit designated government officials to issue local emergency messages and instructions, via the EAS threatened or actual emergencies, are attached to this plan as individual appendices for each EAS local area.

GENERAL CONSIDERATIONS

The listening and viewing habits of the public are inherent factors of consideration and are conducive to the positive effectiveness of the Arkansas EAS. The instinctive reaction of the average person is to turn on his radio or television set in time of emergency. However, continuing public education is required to increase public awareness of the Arkansas EAS as an established medium for the receipt and distribution of emergency national levels.

DEFINITIONS

EMERGENCY – A situation posing an extraordinary threat to the safety of life and property. Examples are, but are not limited to, natural situations such as tornadoes, flash floods, icy conditions, heavy snows, widespread fire; and man-made situations such as discharge of toxic gases, widespread power failure, industrial explosions, civil disorder, and nuclear incidents.

SEVERE WEATHER WATCH – A severe weather *watch* indicates that the probabilities of a particular severe weather storm are high and is an alert to the public of such severe weather conditions.

SEVERE WEATHER WARNING – A severe weather *warning* indicates that a particular severe weather storm has actually been sighted in an area or indicated by radar and serves notice to the public that severe weather conditions are almost certain to occur.

DESIGNATED GOVERNMENT OFFICIALS – The person or persons designated by governments signatory to this procedure to request activation of the EAS and to make emergency announcements (see Annex A).

ACTIVATION

The Arkansas EAS is activated by a request from authorized officials to the state's EAS State Primary (SP) sources. The SP sources, Department of Emergency Management, and AETN are in Conway and are key with respect to activation of the EAS at the state level. All Local Primary (LP) sources in each EAS local area and State Relay (SR) sources should monitor the above SP sources or Arkansas EAS State Relay Network (see Annex F) for further dissemination of state level emergency information to all other stations and cable systems and the public.

GENERAL PROCEDURES FOR USE OF BROADCAST STATIONS AND CABLE SYSTEMS

A.   When a severe weather *watch* is issued by the National Weather Service (NWS) for the State of Arkansas, stations and cable systems in Arkansas can receive a hard copy of the *watch* over any of the following teletype networks: Associated Press (AP), United Press International (UPI), or the NOAA Weather Wire.

B.   When a severe weather *warning* is issued by the NWS for the State of Arkansas, the NWS or another designated official will notify the SP sources (ADEM or AETN), through NOAA Weather Radio, telephone, two-way radio, etc.

C. When a statewide emergency exists, the Governor or a designated official from the list provided to broadcasters and cable operators will determine whether or not to request activation of the Arkansas EAS through the SP sources.

D. For unique emergency situations not involving the entire state, authorities may request EAS activation through the LP source serving the affected EAS local area.

E. The Arkansas State Emergency Communications Committee and the Arkansas Department of Emergency Management will issue a list of authorized officials and authentication procedures for requesting activation of the Arkansas EAS (see Annexes A and B). These are published on a need to know basis.

COMMUNICATIONS BETWEEN THE ARKANSAS DEPARTMENT OF EMERGENCY MANAGEMENT, THE NATIONAL WEATHER SERVICES IN NORTH LITTLE ROCK, AND THE BROADCAST AND CABLE FACILITIES OF ARKANSAS

Commercial telephone exists between the Arkansas Department of Emergency Management, the NWS in North Little Rock, and the broadcast and cable facilities of the state.

State Primary (SP) sources – AETN	(501) 682-2386
Governor's Office	(501) 682-2345
Department of Emergency Management	(501) 329-5601
National Weather Service	(501) 834-0308

IMPLEMENTATION

I. Procedures for Activating Officials.
   A. Request activation of the EAS facilities through the Department of Emergency Management or AETN using prearranged authentication procedures (see Annex B) as soon as possible.
   B. Work out program details (i.e. live or recorded, immediate or delayed) with broadcast and cable personnel.
   C. It is recommended that government officials see the following format when delivering the emergency announcement. The format is deliberately general in nature to allow for the uniqueness of each emergency situation, yet broad enough to ensure completeness.
      1. "This is _____ of _____ with a request to activate the Arkansas Emergency Alert System. I authenticate as follows: _____."
      2. Situation summary (describe the nature of the emergency).
      3. Instructions or message to the public.
      4. Actions being taken by state and/or local government(s).
   D. Keep line open if necessary.
   E. Issue EAS termination.

II.   Procedures for Broadcast Stations and Cable Systems.
       A.   Upon receipt of a request to activate EAS at the state level, the operator at the state level, the operator at ADEM or AETN will authenticate (see Annex B) and, if possible, begin recording all emergency messages and proceed as follows:
          1.   Transmit the following announcement:
             "We interrupt this program because of a state emergency. Important information will follow."
          2.   Transmit the EAS header codes and attention signal. (FCC Regulations, Section 11.51)
          3.   Transmit the following announcement:
             "We interrupt this program to activate the Arkansas Emergency Alert System at the request of __(authority)__ at __(time)__."
          4.   Make the emergency announcement. Repeat as necessary and include the source of the information and time received.
          5.   If EAS operations are now concluded, transmit the EAS End of Message (EOM) code (see FCC Regulations, Section 11.31). Otherwise, keep program open and transmit the EOM code after the program is over.

Important Note: Broadcasters and cable operators have the option of transmitting only the EAS header and EOM codes without the attention signal and emergency announcement. This is acceptable so that the EAS coded messages can be quickly relayed through areas unaffected by the emergency.

       B.   Each broadcast station and cable system, upon receipt of a state level emergency action notification, will, at the discretion of management, perform the same procedures as outlined in II.A above.
       C.   To avoid unnecessary escalation of public confusion, all broadcast stations and cable systems must be cautious in providing information and news pertaining to the emergency. All messages must be based on definite and confirmed facts. The public must not be left to decide what is or is not factual.
       D.   Upon completion of the above transmission procedures, resume normal programming. Appropriate notations should be made in station and cable records and logs of all significant events. These records should be carefully preserved in the event they are required at some later date (FCC Regulations, Section 11.55). Stations and cable systems may send a very brief summary to the FCC for information purposes.
       E.   If operations were not concluded as specified in II.A.5 above, upon receipt of the termination notice from the activating official, make the following announcement and transmit the EOM code:
             "This concludes operations under the Arkansas Emergency Alert System. All broadcast stations and cable systems may now resume normal operations." (repeat announcement)

TESTS

Statewide tests of the Arkansas Emergency Alert System will be conducted at a frequency adequate to assure the successful operation of the system. Tests will be initiated by the broadcast and cable chairs of the State Emergency Communications Committee in coordination with the Arkansas Department of Emergency Management.

ANNEX A

List Of Officials Designated To Activate The Arkansas EAS

- Governor, State of Arkansas
- Director, Arkansas Department of Emergency Management
- National Weather Service, North Little Rock

ANNEX B

Authentication Procedures To Be Used To Activate The Arkansas EAS

The authentication to be used for activation will be determined by the management of the State Primary (SP) source, AETN, and concerned officials. One method is to call back the appropriate number below with authentication codes if they are used as part of the authentication process.

Note: National Weather Service (NWS) warnings received via NOAA Weather Radio, NOAA Weather Wire ,or AP, Reuters, and UPI wire services do not need additional authentication.

Arkansas Department of Emergency Management	(501) 329-5601
National Weather Service, North Little Rock	(501) 834-0308

ANNEX F

## State EAS Monitoring Assignments and Relay Network

Each Arkansas Broadcast Station and Cable Operator will have as their first monitoring source a Local Primary Station (LP) or a State Relay Station (SR). The second monitoring source will one of the Arkansas Education Television Network (AETN) stations (see map for station in your area). It is highly recommended that the third monitoring source be a NOAA Weather Station (see map for station in your area). Stations in towns that border other states may want to consider monitoring a station in that state as a fourth, fifth, or sixth source. As the EAS develops, additional monitoring sources, such as county OES officials, 911 centers or county sheriff offices, may be added. LP stations for each area in the state are listed below.

AREA	COUNTIES	LP – 1	LP – 2
A	Pulaski, Lonoke	KYSG-FM (103.7)	KAAY-AM (1090
B	Fulton, Izard, Sharp, Lawrence, Stone, Independence, Cleburne, Jackson, White	KZLE-FM (93.1)	KWOZ-FM (103.3)
C	Randolph, Clay, Greene, Craighead, Mississippi, Poinsett	KASU-FM (91.9)	KIYS-FM (101.9)
D	Cross, Crittenden, Woodruff, St. Francis, Prairie, Monroe, Lee, Phillips	KBFC-FM (93.5)	KWYN-FM (92.5)
E	Jefferson, Arkansas, Lincoln, Desha	KPBQ-FM (101.3)	KXFE-FM (107.1)
F	Dallas, Cleveland, Ouachita, Calhoun, Bradley, Drew, Union, Ashley, Chicot	KHBM-FM (93.5)	KIXB-FM (103.1)
G	Howard, Sevier, Little River, Hempstead, Nevada, Miller, Lafayette, Columbia	KVMA-FM (107.9)	KKYR-FM (102.5)
H	Crawford, Franklin, Sebastian, Logan, Scott	KISR-FM (93.7)	KMAG-FM (99.1)
I	Boone, Marion, Baxter, Newton, Searcy	KKTZ-FM (107.5)	KTLO-FM (98.3)
J	Johnson, Pope, Van Buren, Conway, Yell, Perry, Faulkner	KMJX-FM (105.1)	KCJC-FM (102.3)
K	Polk, Montgomery, Garland, Saline, Pike, Hot Spring, Grant, Clark	KLAZ-FM (105.9)	KQUS-FM (97.5)
L	Benton, Carroll, Washington, Madison	KKIX-FM	KHOZ-FM (102.9)

Any LP-1 or LP-2 station may also be used as a State Relay (SR) station if there is difficulty in receiving your area LP station. This information must be reported to your state or local EAS Chair
